

## Features and Benefits in MKS AlertCentre®

MKS AlertCentre is a complete solution for monitoring, alerting and corrective action automation scheduling. AlertCentre can monitor your mission-critical systems and applications 24 hours a day, seven days a week to provide you with the peace of mind of knowing that your network, applications, and Internet/Intranet-based information systems are running normally.

Feature	Benefit
<b>Automated Monitoring, Alerting and Corrective Actions</b>	<ul style="list-style-type: none"> <li>▪ Higher Availability of Business-Critical Systems – allows you to maximize revenue and profit and maintain a solid corporate reputation for reliability and service.</li> <li>▪ Improved Worker Productivity – results when employees can connect without delay to email and other critical services at any hour and from any location.</li> <li>▪ Management-by-Exception – enables systems administrators to focus on their day-to-day duties with the peace-of-mind that AlertCentre will notify them of problems whenever and wherever they are.</li> </ul>
<b>Monitoring Solution Wizards</b>	<ul style="list-style-type: none"> <li>▪ Automate the discovery of an applications configuration and generation of the detailed monitors necessary to ensure high availability and maximize performance for the application's specific configuration.               <ul style="list-style-type: none"> <li>▪ Microsoft Exchange Server</li> <li>▪ Microsoft Internet Information Server (IIS)</li> <li>▪ Microsoft SQL Server</li> <li>▪ APC UPC devices</li> <li>▪ Microsoft Windows Servers</li> </ul> </li> </ul>
<b>Web-Based User-Interface</b>	<ul style="list-style-type: none"> <li>▪ Ease of Use – makes it easy to train new system administrators</li> <li>▪ Remote Administration from any web browser – enables your system administrators to react to problems and fix them promptly from anywhere at work and even from home in the middle of the night.</li> </ul>
<b>Agent-less Architecture</b>	<ul style="list-style-type: none"> <li>▪ Ease of Deployment – there is no software to install on monitored servers and devices.</li> <li>▪ Less Ongoing Administration –there is less software to keep up-to-date and configure.</li> <li>▪ Lower TCO – fewer people need to manage your systems.</li> </ul>
<b>Built-in Redundancy</b>	<ul style="list-style-type: none"> <li>▪ Automated Monitoring Fail-Over – you will be notified of problems even if your power fails during non-office hours.</li> </ul>
<b>Built-in Extensibility</b>	<ul style="list-style-type: none"> <li>▪ AlertCentre is built on a platform that includes hundreds of commands and scripting tools for building custom systems management solutions and filling the holes that limit other monitoring solutions.</li> </ul>
